I WHAT I DO

Diagnosis
Why an image reads as fake.
Six measurable signatures, from identical detail in all three colour channels to flat grain. Prompting fixes none of them.

Tool building
Shipped and live.
Web apps on Vercel and Cloud Run that call Gemini and Replicate models, built with Claude Code under my direction.

Client side
Luxury brief to live demo.
I can sit with a brand committee and with engineers in the same week. Pitch-tested with a luxury maison.

HOW I USE AI

AI speeds the work up. The eye, the taste and the final call stay human.

Never on product design. Each asset: human direction, AI base, hand retouch, QC, HERA Passport. Originals stay local; training off.
