WHAT I DO

PIPELINES

Repeatable by design.

Every run prints its alignment, fidelity and processing time, so a result can be rerun and defended in review.

POST-PRODUCTION

Finished by hand.

Retouching and colour grading learned in luxury studios. Skin and fabric corrected by eye after the AI pass.

COMPLIANCE

Safe to ship.

AI use declared per asset under the EU AI Act, NDA-grade confidentiality and provenance that travels with the file.

PROOF

- **HERA Skin Lab, measured on a test bench:** fidelity 0.33 → 0.83, 65% more micro-texture, and under 0.4/255 levels of identity leak even when fed a different face. ← *real bench numbers*
- **Zara Woman, Inditex:** photography, 3D and video published to the sites of 30+ markets. The same multi-market versioning HERA now runs with AI.
- **Final round of a competitive pitch for an LVMH maison** (Holiday 2026 campaign visuals): test delivered in two days, responsible-AI questions answered for the group's committee.

HOW I USE AI

AI speeds the work up. The eye, the taste and the final call stay human.

I don't use it on product design; that belongs to the house. I use it to multiply what was already shot, and I say where.
