

CREATIVE TECHNOLOGIST • AI IMAGING

[linkedin.com/in/your-handle](https://www.linkedin.com/in/your-handle)

I know why generated images look fake, and I build the tools that fix it.

WORKED WITH Zara · Inditex / Mango / Carolina Herrera / Purificación García / Warner Bros. / Hogarth · WPP / Looco

WHAT I DO

Six measurable signatures, from identical detail in all three colour channels to flat grain. Prompting fixes none of them.

Web apps on Vercel and Cloud Run that call Gemini and Replicate models, built with Claude Code under my direction.

I can sit with a brand committee and with engineers in the same week. Pitch-tested with an LVMH maison.

I don't use it on product design; that belongs to the house. I use it to multiply what was already shot, and I say where.

- ◆ **HERA Skin Lab, measured on a test bench:** fidelity 0.33 → 0.83, 65% more micro-texture, and under 0.4/255 levels of identity leak even when fed a different face. ← *real bench numbers*
- ◆ **Final round of a competitive pitch for an LVMH maison** (Holiday 2026 campaign visuals):
test delivered in two days, responsible-AI questions answered for the group's committee.
- ◆ **Zara Woman, Inditex:** photography, 3D and video published to the sites of 30+ markets. The same multi-market versioning HERA now runs with AI.

HERA Skin Lab
heraskinlab.com

Moves real skin texture from an AI pass onto the original photo without changing the face, and switches itself off wherever the model invented detail.

Gemini image models · optical flow · TypeScript · Cloud Run

EXPERIENCE • NEWEST FIRST

AI-assisted image production for luxury: campaign versioning, product-faithful retouching and the HERA Passport, a provenance record shipped with every asset.

Photography, retouching and digital design for Locco's website, social channels and campaigns, including its Asia campaign.

Generative AI for brand content: visual narratives with Midjourney and ChatGPT, AI production workflows, generative visuals for the Toyota C-HR.

Graphic design for the art department, concept sketches and digital illustration; logistics and purchasing.

Photography, 3D and video for the sites of 30+ markets, product-image analysis for e-commerce, and an internal photo plan so every department worked from quality images.

Retouched for photographers and designers, then ran the studio's creative team, budget and production.

PARALLEL TRACK denno, my freelance practice: retouch and creative direction for fashion and lifestyle brands, social and campaign content, photo and video grading.

Measures how AI assistants describe and recommend a business.

Image QA before delivery, manuscript editing in English and Spanish, Instagram editorial kits and a daily project stand-up.
